Primary and secondary 8-hour ozone standards were established in 1997 and set at a level of 0.08 parts per million (ppm). The standards were finalized by U.S. EPA on July 18, 1997 and became effective on September 16, 1997 (62 FR 38856). All other Indiana counties not listed above were designated unclassifiable/attainment under the 8-hour ozone standard.

On March 12, 2008, U.S. EPA lowered the 8-hour ozone standard to a level of 0.075 ppm. The standards were finalized by U.S. EPA on March 27, 2008 and became effective on May 27, 2008 (73 FR 16436).

Attainment of the 2008 8-hour ozone standard is determined by evaluating the three-year average of the fourth highest daily maximum 8-hour average ozone concentration measured at each monitor within a nonattainment area over each year, which must not exceed 0.075 ppm.

On October 1, 2015, U.S. EPA further strengthened the 8-hour ozone standard to a level of 0.070 ppm. The standards were finalized by U.S. EPA on October 26, 2015 and became effective on December 28, 2015 (80 FR 65292).

Attainment of the 2015 8-hour ozone standard is determined by evaluating the three-year average of the fourth highest daily maximum 8-hour average ozone concentration measured at each monitor within a nonattainment area over each year, which must not exceed 0.070 ppm.
